Title

VP, Chief Nursing Officer, Baptist Health Lexington

VP, Cardiovascular, Baptist Health Lexington

VP, Chief Medical Officer, Baptist Health Lexington

Exec Dir, Admin Svs, Baptist Health Lexington

Exec Dir, Cardiovascular Svs, Baptist Health Lexington

Regional Director, Planning

Introduction

This Community Health Needs Assessment provides the foundation for Baptist Health Lexington and other local organizations to strategically plan services and improve the health of the community we serve. This document builds on Baptist Health Lexington's third Community Health Needs Assessment published in August 2018.

Organization Description

Baptist Health Lexington

Baptist Health Lexington, a 434-bed tertiary care facility, is also a major medical research and education center. Established in 1954, Baptist Health Lexington is recognized for its excellence in maternity care, heart care and cancer care, and the hospital's Clinical Research Center conducts groundbreaking research in both fields. Baptist Health Lexington has delivered nearly 160,000 babies. The hospital operates six outlying outpatient centers, including locations in Georgetown and Nicholasville.

Specialized, comprehensive patient services include: heart services, cancer care, women's health, including mother and baby care, neurosciences (stroke care) emergency care, CyberKnife treatment, genetic counseling, orthopedics, home care, weight-loss surgery, rehabilitation services, sleep disorders, and occupational health.

Baptist Health has a network of healthcare providers for patients in the Lexington area – from Baptist Health Medical Group offices, Baptist Urgent Care at Nicholasville Road, Harrodsburg Road, Brannon Crossing in Nicholasville and Baptist Health Occupational Medicine.

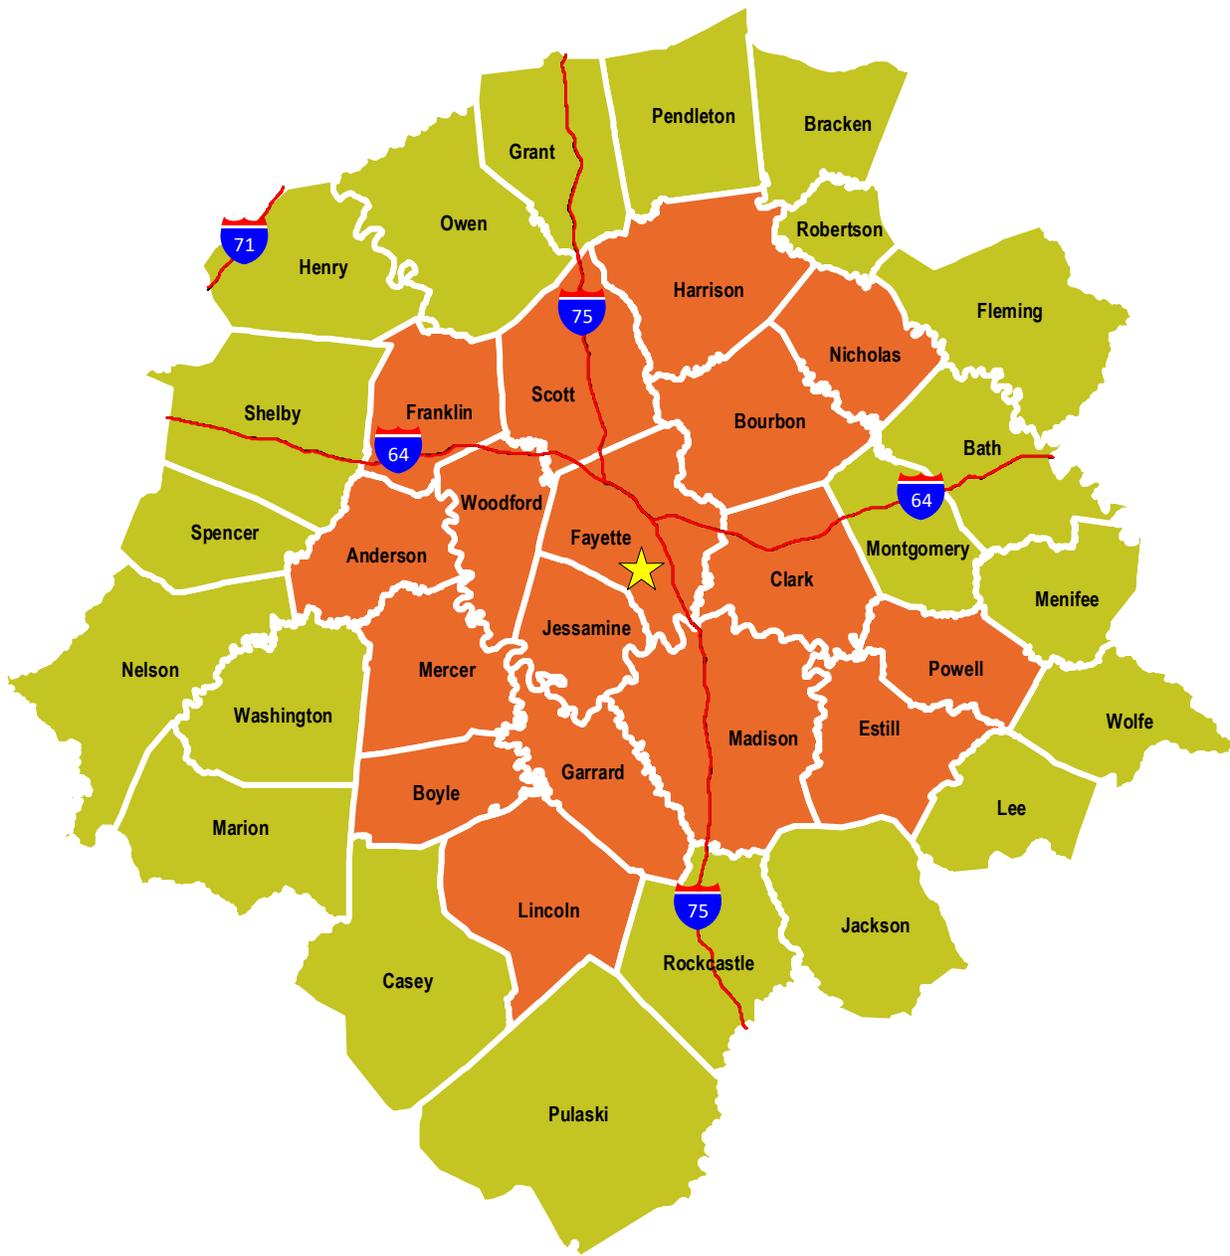

Baptist Health

Baptist Health Lexington is part of Baptist Health, a not-for-profit, 501(c)(3) healthcare corporation that owns and operates nine hospitals with 2,770 licensed beds located in Paducah, Madisonville, Louisville, La Grange, Lexington, Richmond, Corbin and Elizabethtown in the commonwealth of Kentucky and in New Albany, Indiana. In addition, Baptist Health Medical Group (BHMG), a wholly owned subsidiary of Baptist Health, employs over 1,556 primary care physicians, specialty physicians, and mid-level providers and operates occupational health, physical therapy services, sports medicine, Express Care Clinics, hospice and home care services, and urgent care facilities. Baptist Health Home Care (BHHC) provides home health services in 52 counties in Kentucky, six in southern Indiana, and six in southern Illinois.

Service Area

Baptist Health Lexington defines its service area for this Community Health Needs Assessment by looking at where the majority of its inpatients reside. During FY 2020, over seventy-eight percent (78.1%) of Baptist Health Lexington’s inpatients originated from the primary service area (see chart below).

Mission, Vision, and Values

All Baptist Health Lexington employees are expected to help fulfill the mission, vision and value statements adopted by the system.

Mission

Baptist Health demonstrates the love of Christ by providing and coordinating care and improving health in our communities.

Vision

Baptist Health will lead in clinical excellence, compassionate care, and growth to meet the needs of our patients.

Faith-based Values

Integrity, Respect, Compassion, Excellence, Collaboration and Joy.

Purpose

The Patient Protection and Affordable Care Act enacted March 23, 2010, added new requirements that hospital organizations must satisfy in order to be described in section 501(c)(3). Two of these requirements for hospitals are to assess the health needs of their communities and adopt implementation strategies to address identified needs.

This Community Health Needs Assessment is performed for a variety of reasons, including:

- To help meet the hospital's mission to demonstrate the love of Christ by providing and coordinating care and improving health in our communities.
- To comply with the Patient Protection and Affordable Care Act of 2010 and maintain the hospital's tax-exempt status.
- To establish community health needs for the hospital's service area to help prioritize resource allocation.
- To gather data that can be used in other efforts to obtain grants and qualify for awards and certifications.
- To determine available resources in the hospital's service area and how the hospital can coordinate activities with other agencies.
- To involve appropriate individuals and groups in the process to ensure needs are identified, efforts are not duplicated, and the correct agencies to handle specific issues are identified in the strategic implementation plan.
- To create a sustainable process for conducting a Community Health Needs Assessment that can be replicated and continued for future assessments.

Executive Summary

The Patient Protection and Affordable Care Act of 2010 included a provision that requires every tax-exempt, non-governmental hospital to:

- Conduct a Community Health Needs Assessment (CHNA) at least every three years
- Adopt a Strategic Implementation Plan (SIP) that identifies how the needs identified in the assessment will be met and by whom
- Report to the Internal Revenue Service via its 990 tax form how it is meeting its implementation plan

The CHNA must show how broad input from the community served by the hospital was collected and must be made widely available to the public.

This report details the process used to gather, disseminate, and prioritize the information used in the assessment. Baptist Health Lexington worked closely with numerous institutions, agencies, and individuals representing public health, other hospitals, and community members.

Framework

A wide variety of community resources were consulted during this process. It began with meetings between the Baptist Health hospitals. During these meetings, updates to the 2018 CHNA were discussed.

Baptist Health Lexington determined its service area for the project using the most recent patient origin data (FY 2020), including over 78% of its discharges in the ZIP codes chosen.

There are numerous health departments in the Baptist Health Lexington service area responsible for the counties Baptist Health Lexington serves. Each health department's community improvement plan was evaluated by the committee and those initiatives were considered throughout the process of determining the goals for the Baptist Health Lexington Community Health Needs Assessment.

Baptist Health Lexington also solicited public opinion on community health needs using a survey distributed via social media, the Baptist Health Lexington website and via email to Baptist Health Lexington patients. Survey responses, coupled with the information from the respective health departments, were considered as primary data.

Secondary data, from demographics and socioeconomic sources, Kentucky vital statistics, disease prevalence, and health indicators and statistics, were collected. National, state, and local sources were used. This data will be shared in the next section.

Finally, the Community Health Needs Assessment Committee met to consider all the information. They discussed the data presented and created a revised list of the health issues that were identified in both primary and secondary data sources. After robust interaction, the committee prioritized the list and discussed various ways the hospital could help to meet these needs. This report was written and sent to all committee members for additional comments and suggestions. After these were incorporated, the CHNA was approved by the hospital and system boards.

Profile of the Community

Demographics and Socioeconomics

Baptist Health Lexington serves ZIP codes in many counties throughout central and eastern Kentucky. The following table shows the demographics and socioeconomic characteristics of Baptist Health Lexington’s CHNA primary service area for the most recent period available.

* Per CDC, There is no output if the data is unavailable or statistically unreliable

Significantly Below KY Rate
 Significantly Above KY Rate

These rates are age-adjusted and signify the number of persons who expired per 100,000 population. The numbers in green are significantly below the Kentucky rates, while the numbers shown in red are significantly higher. These may indicate areas that are doing better (or worse) in the care of specific conditions.

Cancer Incidence Rates

Cancer Incidence rates are from the Kentucky Cancer Registry and cover a five-year span. High incidence rates may show that the residents are not seeking or receiving the care they need, or it could be due to poor health behaviors or environmental hazards. The numbers in the table below that are highlighted in green are more favorable than the Kentucky average, and the ones in red less favorable.

Age Adjusted Cancer Incidence	KY	Anderson	Bourbon	Boyle	Clark	Estill	Fayette	Franklin	Garrard	Harrison	Jessamine	Lincoln	Madison	Mercer	Nicholas	Powell	Scott	Woodford

Health Statistics and Rankings

Baptist Health Lexington collected health statistics and outcome measures from a wide variety of sources. The most recent data came from the Robert Wood Johnson County Health rankings, which were published in 2020. The tables on the following page shows health outcomes, health behaviors, clinical care availability, socioeconomic factors, and physical environment risks for each county in Baptist Health Lexington’s service area. The rankings are based on the 120 counties in Kentucky. Fayette County is ranked 5 out of 120 Kentucky counties in health outcomes, but several counties in the service area were ranked very low, including Estill, Harrison, Nicholas, and Powell counties.

Similar to the mortality and cancer incidence rates summaries, red highlights indicate a metric is significantly above Kentucky rates, and green highlights indicate a metric is significantly below Kentucky rates.

Primary Data

There are numerous health departments in the Baptist Health Lexington service area responsible for the counties Baptist Health Lexington serves. Each health department’s community improvement plan was evaluated by the committee, and those initiatives were considered throughout the process of determining the goals for the Baptist Health Lexington Community Health Needs Assessment.

Baptist Health Lexington also solicited public opinion on community health needs using a survey distributed via social media, the Baptist Health Lexington website and via email to Baptist Health Lexington patients. Survey responses, coupled with the information from the respective health departments, were considered as primary data.

Community Healthcare Resources

There are many healthcare resources in Baptist Health Lexington’s service area. The Baptist Health Planning Department catalogued the various types and locations of these resources.

Hospitals

There are five hospitals in Fayette County and a total of 17 in the Baptist Health Lexington service area including one psychiatric center. The following table lists the hospitals in the service area.

Hospital	Type	Licensed Beds	Location
University of KY Hospital	ACUTE	724	Fayette

Other Licensed Facilities

According to the Kentucky Office of the Inspector General, there are a number of other licensed healthcare facilities in Baptist Health Lexington's service area. There are too many to mention for this report.

Health Departments

As stated earlier, there are a number of different health departments located in Baptist Health Lexington's service area.

Physicians

Baptist Health is conducting a primary care strategic plan in 2018, including a physician manpower study that counts the number of physicians in its service area as defined by Stark II regulations, which is slightly different from the CHNA service area. This plan guides Baptist Health Lexington to recruit and/or employ primary care to the area. The plan will be adjusted over time as strategic plans are implemented and patient access locations are opened throughout the service area.

Committee Discussion

During the Community Health Needs Assessment Committee meeting, members expressed their thoughts about several health concerns in the area and where Baptist Health Lexington should concentrate its resources over the next three years. The committee included senior hospital leadership and specific department directors.

After studying the primary and secondary data, the committee discussed the issues. First and foremost, the team unanimously agreed that the opioid crisis is the top-of-mind community health issue. The committee agreed that this health issue is creating additional stress on agencies throughout the community, including the hospital. After much discussion, it was determined that cancer and cardiovascular disease were the other two issues that the hospital would prioritize for the next three years.

Prioritized Health Issues

The committee identified a number of community health issues. Using a voting methodology, the team then identified the top three the hospital will focus on over the next three years. They are:

- Substance Abuse
- Cancer
- Cardiovascular Disease

Opioid abuse has become an epidemic across the country. The committee ranked it as their first priority in terms of public health issues. Locally, we are seeing a similar surge of opioid usage admissions and emergency room visits. Similar to obesity, opioid abuse has an impact on overall health and can lead to other co-morbidities. In addition, the service area is seeing a greater presence of drug-addicted newborns that must be sent to neonatal intensive care units to treat withdrawal symptoms.

As cancer continues to be a leading cause of death in this service area, the committee ranked it as their second priority in terms of public health issues. The committee acknowledged the continued need for board-certified oncologists and easy access to cancer-related services such as chemotherapy and radiation therapy.

Cardiovascular disease ranked as the committee's third priority and encompasses coronary artery disease, heart attack, arrhythmias, heart failure, cardiomyopathy and vascular disease. The discussion focused on education, prevention and treatment. The goal is to expand public awareness of disease root causes and common associated conditions to increase compliance with standard-of-care protocols.

Strategic Implementation Plan

Baptist Health Lexington will develop its implementation strategy over the next several months. This document will be published and made available in the same manner as this Community Health Needs Assessment.

The committee reviewed the 2019-2021 Strategic Implementation Plan. It found the majority of goals and activities had been achieved. Those that are in areas covered by this plan will be continued and monitored.

The strategic implementation plan is outlined by each prioritized health need, with a goal(s) for each need, and specific strategies to meet those goals.

Cancer

Identified Health Need: Cancer				
Goal 1: Increase the awareness of the importance of early detection and prevention of breast, lung, colon, and gynecological cancers through screening and educational programs.				
Strategy	Action Plan	Evaluation Plan	Internal Resource(s)	External Partner(s)
1.1 GI Center of Excellence	Obtain GI Center of Excellence designation.	Achieve designation by 2024.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	TBD
1.2 Employ Additional MDs	Employ additional GI physicians.	Track the number of physicians and increased number of screenings.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	TBD

1.3 Physician Outreach	Provide information on breast, GYN, lung, and GI programs and screening information to primary care offices and specialists throughout eastern and central Kentucky. Promote research opportunities as they relate to lung, breast, and colon cancers offered at BH Lexington.	Track the number of clinics visited.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	TBD
1.4 Health Talks	Use as an outlet to educate the community on advancements in treatments, as well as prevention and screening for breast, GYN, lung, and colon cancers.	Publish at least one new cancer-related Health Talk per year.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	TBD
1.5 Community Agency Partnerships	Participate and partner with community agencies, such as ACS, Susan G. Komen, Mission: HPV Cancer Free, American Lung Association, Kentucky Cancer Link, Colon Cancer Prevention Project, and the Lung Cancer Alliance.	Promote at least one cancer prevention activity per year with community partners.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	American Cancer Society Susan G. Komen American Lung Association Kentucky Cancer Link Colon Cancer Prevention project Lung Cancer Alliance
1.6 Employee Wellness Event	Offer screening(s) at annual event.	Promote at least one cancer screening during annual wellness event.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	TBD

1.7 Family Practice Associates TV Show	Oncology pathway physicians make regular appearances on local TV show (cable and in FPA waiting rooms) providing education on cancer-related care and technology.	Have at least two oncology physicians per year appear on the show or on interactive social media about cancer-related topics.	Executive Director, Oncology VP, Cardiovascular and Oncology Services	Local media outlets
---	---	---	--	---------------------

Substance Abuse

Identified Health Need: Substance Abuse				
Goal 1: Expand access to and reduce stigma for substance abuse services through community education and other hospital-based programs.				
<i>Strategy</i>	<i>Action Plan</i>	<i>Evaluation Plan</i>	<i>Internal Resource(s)</i>	<i>External Partner(s)</i>
1.1 Hospital Opioid Stewardship	Reduce the number of opioids prescribed by BH Lexington through physician and nursing education.	Track for a decrease in percentage of opioids prescribed.	Chief Medical Officer	TBD
1.2 Opioid Symposium	Educate clinical leadership through Opioid Symposium event.	Track total attendance at event.	Chief Medical Officer	TBD
1.3 Nursing Education	Educate nursing staff on opioid utilization and increase awareness of opioid abuse.	Track the percentage of staff completing the required education module.	Chief Medical Officer	TBD
1.4 TAA Partnership	Partnership through Thoroughbred Anesthesia Academy to educate anesthesia providers on opioid stewardship.	Track attendees at educational offerings.	Chief Medical Officer	Thoroughbred Anesthesia Academy

1.6 Community Education	Engage in community education partnerships, such as working with Voices of Hope, the community Opioid Awareness Day, and other local agencies to assist in education of the community.	Track the number of partnerships and attendance at events.	Chief Medical Officer	Voices of Hope Opioid Awareness Day Other community agencies
1.7 Develop Materials	Develop educational brochures on safe opioid disposal, pain management alternatives, and expectations of pain management for distribution within the hospital and at outpatient physician offices.	Track the number of patients reached based on total number of brochures ordered and distributed across BH Lexington.	Chief Medical Officer	TBD

Cardiovascular Disease

Identified Health Need: Cardiovascular Disease

Goal 1: Increase awareness of the importance of early detection and prevention of cardiovascular disease by implementing and/or maintaining current programs, education, and preventive screenings.

<i>Strategy</i>	<i>Action Plan</i>	<i>Evaluation Plan</i>	<i>Internal Resource(s)</i>	<i>External Partner(s)</i>
1.1 Health Talks	Use as an outlet to educate the community on prevention of cardiovascular disease and new treatment modalities.	Produce a minimum of two cardiovascular health talk per year. Health talks posted on Baptist Health Lexington website: healthtalks.baptisthealth.com . Measure the number of website updates.	VP, Cardiovascular and Oncology Services	TBD
1.2 Community Screenings and Outreach	Participate and partner with community agencies such as the American Heart Association	Promote at least one cardiovascular screening event with community partners per year. Measure the number of promotions.	VP, Cardiovascular and Oncology Services	

1.3 Stroke Screenings	Conduct an annual stroke screening.	Measure the number of screenings.	VP, Cardiovascular and Oncology Services	
1.4 Health Risk Assessments	Conduct heart health and stroke risk assessment for employees. Provide online heart health and stroke risk assessments for the community.	Measure the number of screenings and number of follow-ups.	VP, Cardiovascular and Oncology Services	
1.5 Cardiology Physician Outreach	Provide annual community health talk.	Measure the number of those attending talk.	VP, Cardiovascular and Oncology Services	Other Community Providers

Goal 2: Develop community partnerships to educate local residents on healthy lifestyles and ways to manage cardiovascular disease.

<i>Strategy</i>	<i>Action Plan</i>	<i>Evaluation Plan</i>	<i>Internal Resource(s)</i>	<i>External Partner(s)</i>
2.1 Cardio-vascular and Stroke Screenings	Conduct cardiovascular screenings in the community and with employers.	Measure the number of screenings.	VP, Cardiovascular and Oncology Services	TBD
2.2 CPR Training with AHA	Work with AHA to provide hands-only CPR training.	Measure the number of sessions and participants.	VP, Cardiovascular and Oncology Services	American Heart Association
2.3 Heart Walk	Participate in annual Heart Walk.	Measure the number of attendees.	VP, Cardiovascular and Oncology Services	American Heart Association
2.4 Heart Ball	Sponsor and support AHA Heart Ball.	If appropriate, track restricted sponsorship as community benefit.	VP, Cardiovascular and Oncology Services	American Heart Association
2.5 A-fib Community Education	Provide annual community education on prevention, identification and treatment of A-Fib.	Measure the number of sessions and participants.	VP, Cardiovascular and Oncology Services	Various community partners
2.6 Mended Hearts	Work with Mended Hearts to provide pillows for open heart patients.	Measure the number of pillows provided.	VP, Cardiovascular and Oncology Services	Mended Hearts

2.7 Partnership with local EMS	Partner with EMS to provide education and public awareness.	Measure the number of promotions.	VP, Cardiovascular and Oncology Services	Local EMS agencies
2.8 Heart & Valve Center	Provide community education on prevention and new patient access.	Measure the number of sessions and new patients.	VP, Cardiovascular and Oncology Services	(none)
2.9 Heart Failure Clinic	Provide community education on prevention and new patient access.	Avoid hospital readmissions. Measure sessions and the number of new patients.	VP, Cardiovascular and Oncology Services	(none)
2.10 Family Practice Associates TV Show	Have at least two cardiology pathway physicians per year appear on the show to talk about cardiology-related topics.	Measure the number of segments.	VP, Cardiovascular and Oncology Services	Local media outlets

Communications Plan

The IRS guidelines for a Community Health Needs Assessment call for making the results of the process widely available. To meet this requirement, Baptist Health Lexington will publish this document on its website and make hard copies available to the public upon request. These results will be incorporated into Baptist Healthcare System's annual IRS tax form 990 submission.

Conclusions

Baptist Health Lexington will continue to use this Community Health Needs Assessment and Strategic Implementation Plan to allocate resources to improve the health of its service area. This is in keeping with its mission and is in its best interest because improving population health will reduce healthcare costs.
