Thanks to our doctors for treating you well.

Western Baptist Hospital's medical staff of 240 physicians, representing 40 specialties, brings to our patients a quality perhaps even more important than their years of training and service—their dedication to treating you well.

As we observe Doctors Day on March 30, join us in thanking them for their innovation, compassion and care.

In the ever-changing world of healthcare, we are blessed to have physicians whose commitment to advancing patient care is unwavering. As the CEO of Western Baptist Hospital since 1992, I am honored to work closely with this talented, devoted and diverse group of medical care professionals. In celebration of Doctors Day 2011, I wish to publicly thank each one for their contributions to the innovation, compassion and care that make Western Baptist the region's preferred healthcare provider.

Larry Barnes
President & Chief Executive Officer

For more than 25 years, I worked as an interventional cardiologist here, and I have seen Western Baptist develop into the region's top medical center. Now, in my role as vice president/chief medical officer, I am honored to work with our medical staff in the hospital's ongoing development. We are in a new beginning, new technology and treatments in our region, so we can continue the hospital's mission of Christian service and enhancing the health of the people and communities we serve.

Patrick J. Wilson
Vice President/Chief Medical Officer
